

NUTRACOX

*Natural Control of **Coccidia***

Reduces the count of
resistant oocysts against
chemical anticoccidials

Decreases the residue
of chemical anticoccidials
in chicken

Good to be used alone, or
in rotation/shuttle programs
with ionophores

NUTRACOX

Natural Control of Coccidia

Composition

Phyllanthus amarus 5%, Solnaum nigrum 7%, Trachyspermum ammi 12%, Acacia catechu 15%
Andrographis paniculata 9%, Punica granatum 8%, Holorrhena antidysentrica 17%
Azadirachta indica 10%, Trigonella Foenum-graecum 6%, Glycyrrhiza glabra 4%
Cuminum cyminum 4%, Boerhavia diffusa 3%

Benefits

- Powerful natural anticoccidial for prevention of coccidiosis
- Interferes with all the stages of life cycle of coccidia
- Protects gut membrane and improves its integrity
- Promotes gut microflora and improves digestive process
- No resistance development and no withdrawal period required
- Helps in production of residue free animal protein

Inclusion

- Layers and Broilers: 750g/MT of feed
- To be given throughout rearing period
- NutraCox replaces ionophores completely or can be used in rotation/shuttle program

Pack size

25kg
