

RESPGUARD

LIQUID

***For A Healthy
Respiratory System***

RESPOGUARD
is a synergistic
herbal formulation
that promotes clear
airways and optimal
respiratory health in
poultry and
livestock.

THE CHALLENGE

- Intensive farming, poor ventilation, and low biosecurity increase the risk of respiratory disorders including Complicated Chronic
- Respiratory Disease (CCRD).
Bacteria, viruses, mycoplasma, and airborne allergens such as dust, smoke, and mold damage the respiratory tract - causing cough, nasal discharge, and reduced productivity.
- Antibiotics treat infection but do not build immunity.

THE SOLUTION

RESPOGUARD works as a natural expectorant and respiratory tonic to:

- Clear congestion and ease breathing
- Boost respiratory immunity against pathogens
- Support tracheo-bronchial health and lung function
- Protect against environmental stressors like dust, pollen, and smoke

RESP GUARD

LIQUID

For A Healthy Respiratory System

BENEFITS:

- Ensures normal breathing and functioning of respiratory system
- Prevents poultry birds from various respiratory diseases
- Supports anti-biotics for fast & complete recovery from respiratory infections
- Naturally stimulates protective mechanism and functioning of respiratory system
- As decongestant, for normal breathing in stressed birds
- Anti inflammatory and bronchodilator in action
- Mucin enhancer, preventing microbial attachment to trachea
- Improves oxygenation of cells and reduces gasping

DIRECTION FOR USE:

For each 100 birds per day		
Broilers	Layers/Breeders	
1-2 wks.	1-8 wks.	10 ml
3-4 wks.	9-20 wks.	20 ml
5-6 wks.	21-72 wks.	30 ml
Average dose: 200-250ml/1000L of water		
To be given for 10-15 days or as required		

Pack Size:

1L, 5L & 30L
