

RESPGUARD

LIQUID

***For A Healthy
Respiratory System***

RESPOGUARD
is a synergistic
herbal formulation
that promotes clear
airways and optimal
respiratory health in
poultry and
livestock.

THE CHALLENGE

- Intensive farming, poor ventilation, and low biosecurity increase the risk of respiratory disorders including Complicated Chronic
- Respiratory Disease (CCRD).
Bacteria, viruses, mycoplasma, and airborne allergens such as dust, smoke, and mold damage the respiratory tract - causing cough, nasal discharge, and reduced productivity.
- Antibiotics treat infection but do not build immunity.

THE SOLUTION

RESPOGUARD works as a natural expectorant and respiratory tonic to:

- Clear congestion and ease breathing
- Boost respiratory immunity against pathogens
- Support tracheo-bronchial health and lung function
- Protect against environmental stressors like dust, pollen, and smoke

RESP GUARD

LIQUID

For A Healthy Respiratory System

COMPOSITION:

Each 100 ml contains extract of *Adhatoda Vasica* 20 gm, *Zingiber officinale* 2.5 gm, *Glycyrrhiza glabra* 3 gm, *Ocimum sanctum* 5 gm, *Solanum xanthocarpum* 10 gm, *Eucalyptus globulus* 10 gm, *Albizia lebbeck* 10 gm, *Cyperus rotundus* 5 gm, *Hedychium spicatum* 5 gm, *Tracyspermum ammi* 5 gm, *Curcuma longa* 5 gm, *Onosma echinoides* 0.5 gm, *Oroxylum indicum* 0.5 gm & *Operculina turpethum* 0.25 gm.

BENEFITS:

- Ensures normal breathing and functioning of respiratory system
- Prevents poultry birds from various respiratory diseases
- Supports anti-biotics for fast & complete recovery from respiratory infections
- Naturally stimulates protective mechanism and functioning of respiratory system
- As decongestant, for normal breathing in stressed birds
- Anti inflammatory and bronchodilator in action
- Mucin enhancer, preventing microbial attachment to trachea
- Improves oxygenation of cells and reduces gasping

INDICATION:

Effective in the control (as a supportive) and prevention of respiratory disease.

DOSE:

Livestock:

Up to 100 kg body weight 20 ml, twice daily.

100 to 200 kg body weight 30 ml twice daily.

200 kg body weight 40 ml, twice daily.

Poultry:

1 ml per 3 to 4 liter of drinking water.

Pack Size:

1L, 5L & 30L
